

Feature	Batch Tag Editor
Tested By	Brandon Chow
Reviewed By	Kenny Lam
Date	December 25, 2015

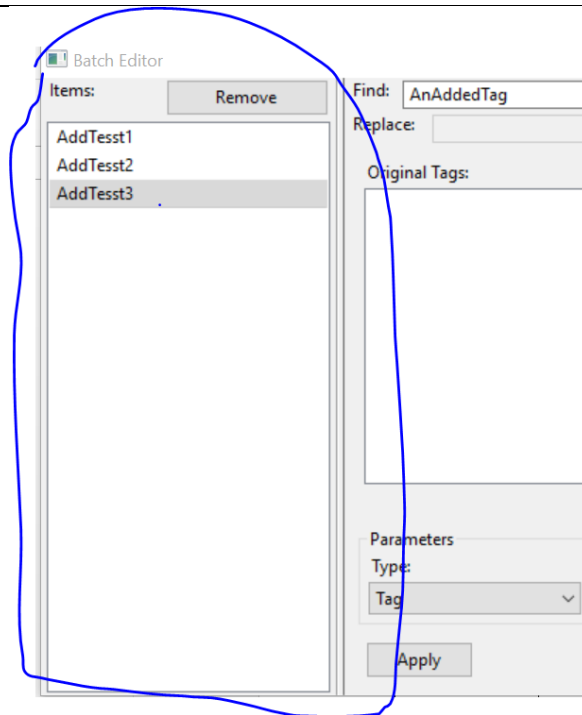

Description	Check if batch tag additions are stored properly.
Setup	1. Create a record.
Instructions	<ol style="list-style-type: none"> 1. Add the item to the “Batch Tag Edit Queue”  2. Go to the Batch Tag Edit window  3. Change your edit settings to match the image below  4. Input a tag to the “Add” text field located at the top. Press enter to enter that into the change log. Your window should look similar to the one below.

	<div data-bbox="479 191 1445 703"><p>Add: <input type="text" value="AnAddedTag"/></p><div><p>Tags to be Added:</p><div><p>AnAddedTag</p></div></div><p>0 changes</p></div> <p>Here is a full screen state of what your window should look like</p> <div data-bbox="479 741 1421 1234"><p>Batch Editor</p><div><p>Items: <input type="button" value="Remove"/></p><div><p>AddTest1</p></div></div><div><p>Find: <input type="text"/></p><p>Add: <input type="text" value="AnAddedTag"/></p><div><p>Tags to be Added:</p><div><p>AnAddedTag</p></div></div><p>0 changes</p><div><p>Parameters</p><div><p>Type: <input type="text" value="Tag"/></p><p>Action: <input type="text" value="Add"/></p><p>Scope: <input type="text" value="Items"/></p><p>Collection: <input type="text" value="Acceptance Test"/></p><p><input type="button" value="Apply"/></p></div></div></div></div> <p>5. You can now press the “Apply” button located at the bottom of the window.</p> <div data-bbox="479 1266 1421 1759"><p>Batch Editor</p><div><p>Items: <input type="button" value="Remove"/></p><div><p>AddTest1</p></div></div><div><p>Find: <input type="text"/></p><p>Add: <input type="text" value="AnAddedTag"/></p><div><p>Tags to be Added:</p><div><p>AnAddedTag</p></div></div><p>0 changes</p><div><p>Parameters</p><div><p>Type: <input type="text" value="Tag"/></p><p>Action: <input type="text" value="Add"/></p><p>Scope: <input type="text" value="Items"/></p><p>Collection: <input type="text" value="Acceptance Test"/></p><p><input type="button" value="Apply"/></p></div></div></div></div> <div data-bbox="191 1759 370 1833"><p>Expected Result</p></div> <div data-bbox="370 1759 1445 1833"><p>- This should have added the tag “AnAddedTag” to the item “AddTest1”. You should check the list of tags of the item and see if the tag was correctly added.</p></div>
--	---

Description	Check if Batch Tag Remove works correctly
Setup	<ol style="list-style-type: none"> 1. Create 3 records. 2. Add a common tag to each of these records
Instructions	<ol style="list-style-type: none"> 1. Add the 3 records to the Batch Tag Edit Queue (Note: You can select multiple records and add them in batched) <div data-bbox="490 476 1404 968" data-label="Image"> </div> 2. Change the edit settings to match the image below. <div data-bbox="490 1075 1367 1167" data-label="Image"> </div> 3. Search the tag that belongs to your created records in the “Find” text field. <div data-bbox="490 1272 1346 1841" data-label="Image"> </div>

	<div>4. You can then click the tag in the first list. It will then be moved over to the second list.</div> <div>5. Your window should look similar to the image below</div> <div></div> <div>6. You can then click “Apply” to save these changes.</div>
Expected Result	<ul style="list-style-type: none">• If you check the items, they should no longer contain the tag that we removed.

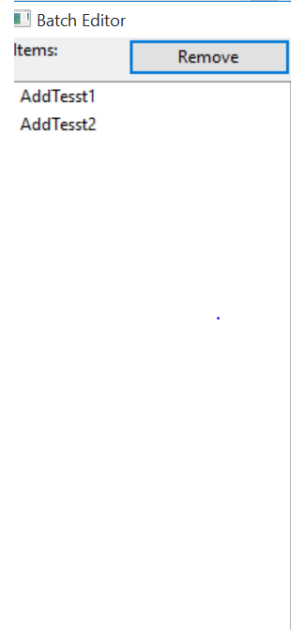

Description	Check if removing items from Batch Tag Edit Queue works
Setup	<div>1. Add some records to the Batch Tag Edit Queue</div> <div>2. Open the Batch Tag Window</div>
Instructions	<div>1. On opening the Batch Tag Window, we should have some entries in the list on the side</div>

2. From the image above, we have 3 records in our Batch Tag Edit Queue. Select one of the records and click the remove button above.

Expected Result

- The entry should have been removed from the list like in the image below.

Description	Check if modifying/merging tags work
Setup	<ol style="list-style-type: none"> 1. Create 3 records 2. Add a similar tag for two of the records and a unique tag for the other record
Instructions	<ol style="list-style-type: none"> 1. Add all 3 items to the Batch Tag Edit Queue 2. Change the edit settings to match the image below <div data-bbox="472 367 1385 466" data-label="Form"> </div> 3. Search for the tag that belongs to two of the records. Your window should look similar to the one below <div data-bbox="472 537 1373 1014" data-label="Form"> </div> 4. In this case, we want to change the tag “NuTag” to “NewTag”. Enter “NewTag” into the “Replace” text field. Click on the “NuTag” entry in the list. Your window should look similar to the one below <div data-bbox="472 1157 1401 1650" data-label="Form"> </div> 5. This should modify all occurrences of “NuTag” for records in our Batch Edit Queue to “NewTag” 6. Click “Apply”
Expected Result	<ul style="list-style-type: none"> - The tags of all our three items should now have the similar tag.
